

1:The TFR over the NAS should NOT be made permanent as a Prohibited Area.

2:The TFR is not an asset to any security and is indefensible no matter what it is upgraded to.

3:The TFR is an unrealistic intrusion into the freedom of the nations airspace for the use of the citizens of this nation.

4:There have already been too many security over-reactions already, there is no good reason to make more errors - which once done, may go on based upon the same defective thinking / errors forever.

5:This is a very damaging concept as it has already been applied, and to escalate this higher is merely a greater magnitude defect in logic.

6:This has caused un-necessary harm to local businesses in the effected area as it is, it places larger road blocks into the airspace system than already exist, and further clogs the system without good cause.

7: I hereby request that this plan, to add further restrictions, be dropped as the bad idea that it is.
